

Exceptional Partnerships, Exceptional Training.

Is aviation in your blood? Do you dream of climbing in the cockpit and taking control of an aircraft? Spending your days soaring above the clouds? If you're ready to launch a commercial pilot's career, you've come to the right place – Charter College Aviation.

At Charter College Aviation, we offer aspiring pilots the education they need to prepare for the jobs they want. We have partnered with select Part 141 flight schools to provide aviation education for fixed wing pilots. Our flight school partners provide the ground school and flight instruction at various locations around the country, and Charter College Aviation provides the corresponding online curriculum, financial aid resources and academic support.

We have chosen to partner exclusively with Part 141 schools because of their high standards for quality and safety. Part 141 programs are periodically audited by the FAA and must have detailed, FAA-approved course outlines and meet student pilot performance rates.

Charter College Aviation Benefits:

- Access to Title IV Financial Aid in the forms of Federal Student Loans and Pell Grants for those who qualify
- Experienced financial aid teams
- Academic support program with individual advisors
- Focused career training
- Reduced ATP flight requirement with aviation degree
- Job placement assistance
